Spring 2012

Working together RCHF & Give Eur-Hope to
bring joy and happiness to rural children in
Suceava County, Romania

'Stichting Romanian Children's Humanitarian Foundation' supported by the 'Give Eur-Hope' team in Brussels brought a new sense of joy and happiness to the children at Ciocanesti School in Suceava County in the springtime via a special donation of new sports equipment to the school. Both Stichting RCHF and Give Eur-Hope place a high value on public health and the overall benefit of this donation to Ciocanesti School will be healthier children who now have a full range of new sports equipment enabling them to keep healthier via sports lessons!

The freely donated sports Equipment purchased by 'Stichting Romanian Children's Humanitarian Foundation' via the donated funds for this purpose from the 'Give Eur-Hope' team included 2 new table tennis tables complete with pallets, net and balls, 1 badminton complete kit with high net, badminton pallets and shuttle cocks, one complete basket ball kit including wall mounting basket and a new full size basketball, plus 2 safe-play dart boards and sets of darts with spare reserve flights.

Children at Ciocanesti School can be seen in the photograph using one of the table tennis tables for the first time with colleges eagerly looking on!

In the Photographs above are seen School sports teacher Mr Dan Bostan and Brian Douglas of RCHF setting up the first of the new table tennis tables at Ciocanesti rural school.

The conclusion of this project was clear to see on the faces of the school children at Ciocanesti School and their eagerness was plain to us as children were trying to enter the sports hall to try their new equipment even before we had finished erecting all the equipment. Its good to help deserving children to a better and healthier future in sport as well as bringina smiles to their faces!

Continued support of Social families in Dorohoi, Botosani County

Since June 2010 Stichting Romanian Children's Humanitarian Foundation has continued to support some of the most needy families in and around Dorohoi in Botosani County. These families are all known to us and have many needs after losing their homes and in many cases entire belongings in the massive flooding in June 2010 that hit Dorohoi small town.

Today though re housed the simple fact is that these families who in the main part have less than 20 Euro a week to live on and out of that have to pay as we all do rent for their social home, plus mains service charges are simply left with insufficient funds to feed their families with weekly.

Here in well-planned aid projects in collaboration with our sponsors we help with extra essential food supplies to save hunger hitting these families, which consist of children of a fragile age and pensioners alike. Within these projects we look for ways to help these families also become more self-sufficient they in time and thus work with families who approve and respect our support projects.

Within the photographs is seen just some of the food aid we supply to very needy families in Dorohoi and the surrounding areas on a regular basis as well as providing other support for instance when a child within these families is sick and as on occasion has to be hospitalized to recover.

We now have extra support for children in social families via Wings of Angels charity in The Netherlands also and in their actions help children to get to school and with educational needs. We also as an NGO still help families in Suceava too who likewise need extra support.

Children help our actions with senior citizens in Suceava County.

Stichting Romanian Children's Humanitarian Foundation places a high emphasis on helping senior citizens including those in care homes in Romania. A friendly chat to a resident who sees no outsider week after week makes all the difference as it arises spirits and hopes.

We were delighted recently when children from Ciocanesti School were we collaborate gave their time freely to join us when we visited the Vatra Dornie (Suceava County) senior citizen Christian run home for old aged people as the presence of these young children thrilled the residents and brought them joy as they spoke to each other.

This is a perfect example of how in our projects young people gain extra experience in life and benefit others voluntarily!

Making light work of log cutting

www.rchf.eu

Thanks again to the wonderful support of the European Union and European Commission staff who fund 'Give Eur-Hope' from their own pockets we at 'Stichting Romanian Children's Humanitarian Foundation-NL' gained sufficient funds to purchase a brand new chainsaw outfit so the teachers and staff at Ciocanesti rural mountain village school can now with ease cut large tree trunks into heating logs to heat the school in the bitter cold autumn, winter and early spring months.

Until now all these logs had been hand cut with a long-saw and then chopped with an axe to reasonable size, thus the chainsaw is a huge saving on labor! In the photograph you see a local man preparing the chainsaw and it being used for the first time in Ciocanesti schoolyard to cut logs.

Bucharest visit

Brian Douglas recently had meetings with Romanian friends in the Capital Bucharest and the good news is that we will in the near future start voluntary actions in Bucharest to help children with special needs. This will compliment our current support of a special need home in Botosani County with over 220 children interned were we help with support actions.

The photo shows the Unirea Boulevard leading to the Peoples palace in Bucharest.

We thank all of our sponsors who make our voluntary work possible in Romania, which is the poorest Country within the EU today were many decent families live in poverty and need our help and support.

Our next edition newsletter will be the Summer 2012 edition, available in the early September month.
